** With double press

Front features

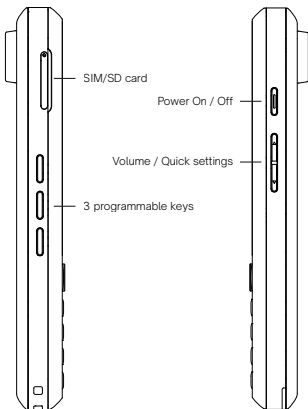

Side buttons and features

Noise canceling MIC

Headset jack

SIM/SD card

Power On / Off

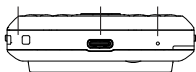

Volume / Quick settings

3 programmable keys

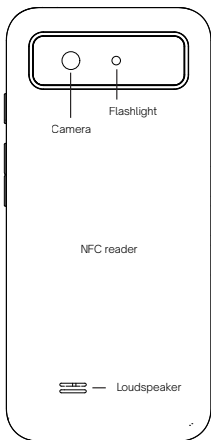

Keychain holes

USB C port

MIC

Back features

3. Safety precautions

To prevent damage to your device, accessories, or connected devices and to minimize the risk of personal injury, discomfort, property damage, or other potential hazards, please follow the precautions below:

- Handle your phone with care to avoid damage to both the device and its battery. Do not disassemble, drop, bend, burn, crush, or puncture your phone, as these actions can lead to serious issues. Avoid using a phone that has a cracked screen or damaged casing.
- Ensure that the power adapter and the phone are well-ventilated when they are in use or charging. Using a damaged phone, faulty cables, or a broken power adapter can lead to overheating, fire, electric shock, injury, or damage to your phone or other property. Additionally, do not expose your phone to liquids, as this can cause short circuits and overheating.
- If your phone gets wet, do not try to dry it with an external heat source. Avoid charging the phone when it is wet or when it is in direct sunlight.
- This device is not a toy. Children have been at risk of strangulation due to cords. Please keep cords out of the reach of children, more than 3 feet (0.9 meters) away.
- Prolonged exposure to loud sounds, including music, can lead to hearing loss. To prevent potential hearing damage, avoid listening at high volume for extended periods. Continued exposure to loud volumes and background noise may make loud sounds seem quieter than they actually are. Always check the volume before using headphones or earphones.

Battery

- This phone contains a lithium-ion battery, which is a sensitive component that can cause injury if damaged. We strongly recommend seeking professional assistance for any device repairs. Self-service repair, including removing or replacing the battery, is not advisable unless you are an adult with the technical expertise to safely repair electronic devices. If you choose to perform a self-repair, you assume the risks associated with it.
- Please exercise caution when engaging in repair work. Opening or repairing your device may expose you to risks such as electric shock, device damage, fire, personal injury, and other hazards.

- We advise contacting us or an independent repair professional for battery replacement. For contact information, please visit: <https://keyphone.tech/say-hello/>.
- Using a non-qualified battery or improper disposal can increase the risks of fire, explosion, leakage, and other dangers. Do not open, or incinerate the battery.

Disposal & recycling

- Dispose of and transport your device, batteries, and accessories in accordance with local environmental and transportation regulations. Do not throw them away with regular household waste.

Medical device interference

- Your phone has magnets that may interfere with pacemakers and other implanted medical devices. Please consult your doctor if you notice any issues.

4. Care and cleaning

Keeping your phone clean can help protect it from stains and wear. Here's how to properly clean your device:

- Turn off and unplug your phone.
- Use a soft, lint-free cloth to gently wipe your phone.
- For streaks, smudges, or dust, use a dry cloth.
- For color transfers (like makeup or dye from new clothes), use a damp cloth.
- For other stains or grime:
 - Screen: Use screen wipes or cleaner designed for eyeglasses.
 - Back and sides: Use ordinary household soap or cleaning wipes that do not contain bleach.

By following these steps, you can help keep your phone looking its best.

5. Warranty

We offer a one-year limited warranty that covers only factory defects; any defects caused by human error are not covered. If you purchased an extended warranty, please keep your digital warranty for any claim.
